COORDINATION CHEMISTRY REVIEWS VOLUME 125, NUMBERS 1–2, MAY 1993

CONTENTS

Preface ix

Vittorio Carassiti. Biographical Notes xi

Inorganic Photochemistry. Then and Now
A. W. Adamson (Los Angeles, USA) 1

Frontiers in Inorganic Chemistry
F. Basolo (Evanston, USA) 13

Solution phosphorescence of *trans*-cyanoacidotetramminechromium(III) complexes. Comparison with models for doublet-state deactivation
E. Zinato and P. Riccieri (Perugia, Italy) 35

Photosensitive chemically modified electrodes for Photogalvanic cells
A. M. Titse, A. M. Timonov, and G. A. Shagisultanova (St. Petersburg, Russia) 43

Further perspectives in organometallic photochemistry
P. Bergamini, E. Costa, S. Sostero, and O. Traverso (Ferrara, Italy) 53

Photochemistry of transition metal octacyanides and related compounds. Past, present and future
A. Samotus and J. Sklarzewicz (Krakow, Poland) 63

From a molecular to a supramolecular photochemistry
V. Balzani, R. Ballardini, F. Bolletta, M. T. Gandolfi, A. Juris, M. Maestri, M. F. Manfrin, L. Moggi, and N. Sabbatini (Bologna, Italy) 75

Advantages and disadvantages of photocatalysis induced by light-sensitive coordination compounds
H. Hennig and R. Billing (Leipzig, Germany) 89

Time-resolved IR spectra of excited states
J. J. Turner, M. W. George, F. P. A. Johnson, and J. R. Westwell (nottingham, UK) ... 101

Photosensitizing action of non-steroidal antiinflammatory drugs on cell membranes and design of protective systems
G. Condorelli, G. De Guidi, S. Giuffrida, and L. L. Costanzo (Catania, Italy) 115

Activation of alkanes: the biomimetic approach
D. Mansuy (Paris, France) 129

Photocatalysis of iron-porphyrin complexes. Biomimetics and catalysis
A. Maldotti, R. Amadelli, C. Bartocci, V. Carassiti, E. Polo, and G. Varani (Ferrara, Italy) 143

Charge-transfer in ion pairs: design of photoreactivity in solution and electrical dark- and photoconductivity in the solid
H. Kisch (Erlangen, Germany) 155

Rate of photon absorption and turnover number: two parameters for the comparison of heterogeneous photocatalytic systems in a quantitative way
V. Augugliaro, M. Schiavello, and L. Palmisano (Palermo, Italy) 173

Phototransformations of nitrogen containing organic compounds over irradiated semiconductor metal oxides. Nitrobenzene and atrazine over TiO_2 and ZnO
E. Pelizzetti, C. Minero, P. Piccinini, and M. Vincenti (Torino, Italy) 183

Photooxidative degradation of polymers by $HO^{\cdot}$ and $HO_2^{\cdot}$ radicals generated during the photolysis of H_2O_2, $FeCl_3$, and Fenton reagents
L. A. Lindén, J. F. Rabek (Stockholm, Sweden), H. Kaczmarek, A. Kaminska (Torun, Poland), and M. Scoponi (Ferrara, Italy) 195

Photodegradable polyolefins. Photo-oxidation mechanism of innovative polyolefin copolymers containing double bonds
M. Scoponi, F. Pradella, and V. Carassiti (Ferrara, Italy) 219

Local probe microscopies and their application to semiconducting materials
O. Enea (Poitiers, France) 231

Atmospheric chemistry: rate constants of the gas-phase reactions between haloalkanes of environmental interest and hydroxyl radicals
C. Chiorboli, R. Piazza (Ferrara, Italy), M. L. Tosato (Roma, Italy), and V. Carassiti (Ferrara, Italy) 241

Evidence of adiabatic channels in the singlet photoisomerization of *cis*-1,2-diarylethylenes: a fluorimetric study
U. Mazzucato, A. Spalletti, and G. Bartocci (Perugia, Italy) 251

Photochemistry of cyclodextrin host-guest complexes
P. Bortolus (Bologna, Italy), G. Grabner, G. Köler (Vienna, Austria), and S. Monti (Bologna, Italy) 261

Radical Cations: generation by photochemical electron transfer and fragmentation
A. Albini (Torino, Italy), E. Fasani, and N. d'Alessandro (Pavia, Italy) 269

Electronic coupling between remote metal centers in cyano-bridged polynuclear complexes
F. Scandola, R. Argazzi, C. A. Bignozzi, C. Chiorboli, M. T. Indelli, and M. A. Rampi (Ferrara, Italy) 283

Potential energy surfaces of short polyenes in the state T_1: analysis of time resolved resonance Raman spectra
G. Orlandi, F. Negri (Bologna, Italy), R. Wilbrandt (Roskilde, Denmark), F. W. Langkilde (Lyngby, Denmark), and A. M. Brouwer (Amsterdam, The Netherlands) 293

Concerning medium polarity effects on the photophysics and photochemistry of TICT-forming dyes
F. Momicchioli, I. Baraldi, A. Carnevali, M. Caselli, and G. Ponterini (Modena, Italy) 301

The ground and excited state electronic structures of ruthenium quinones and related species
A. B. P. Lever, H. Mansui, R. A. Metcalfe (North York, Canada), D. J. Stufkens (Amsterdam, The Netherlands), E. S. Dodsworth, and P. R. Auburn (North York, Canada) 317

Redox, fragmentation and clustering processes in the excitation of metal complexes by fast atom bombardment: relationships with photochemical pathways
T. J. Kemp (Coventry, UK) 333

Perspectives in photochemistry
V. Carassiti (Ferrara, Italy) 351
